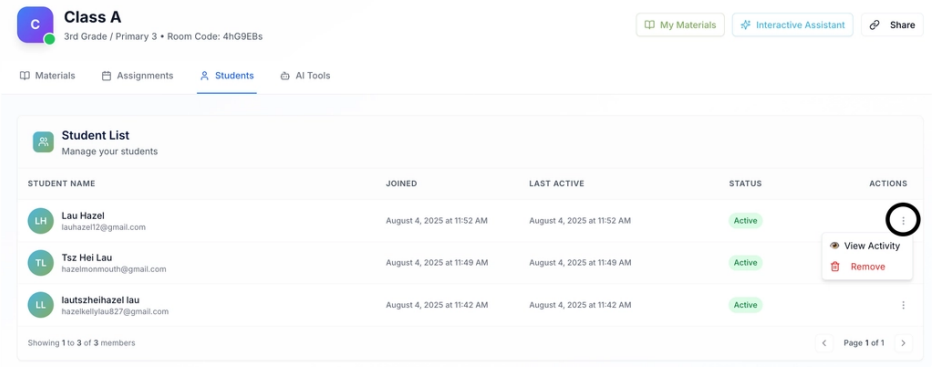
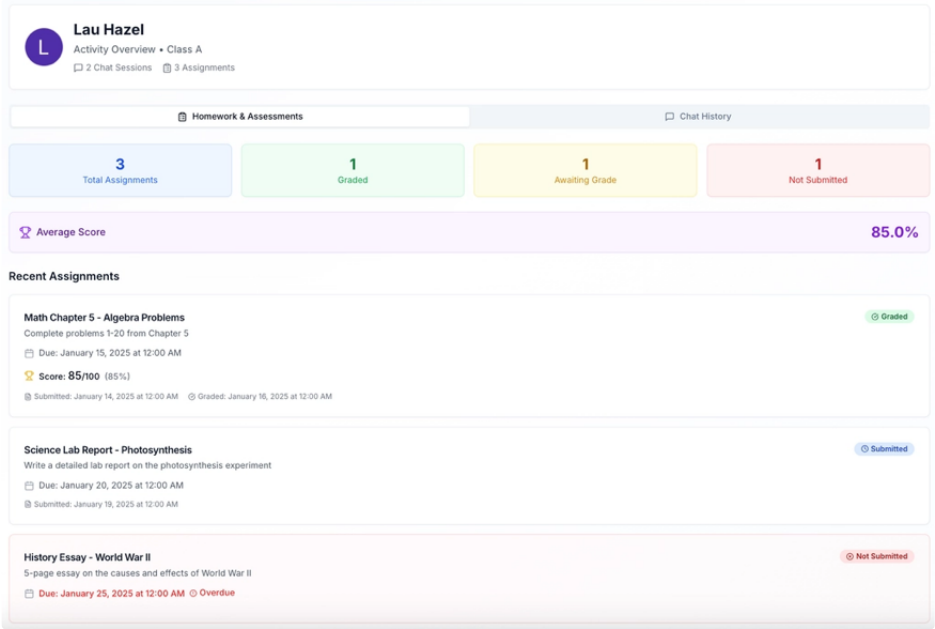
View Students' Activity

Understanding your students' progress is key to effective teaching. This section will guide you through the **View Activity** feature, a powerful tool designed to give you a clear overview of a student's engagement. You can quickly see their status on homework and assessments, track their submission habits, and review their average grades to identify those who may need a little extra support.



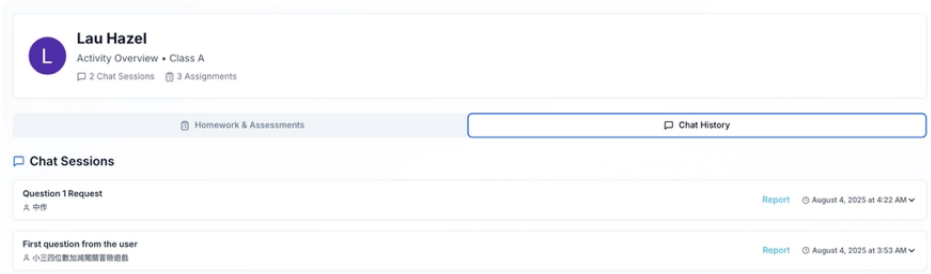
👩🏻‍🏫 Homework and Assessments

This feature provides a quick overview of your students' performance. You can monitor their progress, see the status of each assigned task, and track their average grades at a glance.



⏳ Chat History

This is a powerful tool for monitoring a student's progress and ensuring they are on the right track. You can review their full conversations with the AI and access detailed performance analytics.



Accessing the Analysis Report

For a deep dive into a student's performance on a specific task, click **'Report'** next to any chat session. This report provides a comprehensive breakdown, including an overall score and separate scores for different skills.

You can use the **'Key insights'** and **'SWOT Analysis'** sections to plan next steps for a

student or to inform comments you write for progress reports. These features show you exactly where a student stands in terms of performance and understanding.

Reviewing the Original Conversation

To see the complete back-and-forth conversation, click **'View original conversation'** in the top right corner. This allows you to see how the student interacted with the AI and exactly how their responses compare to the correct answers.
