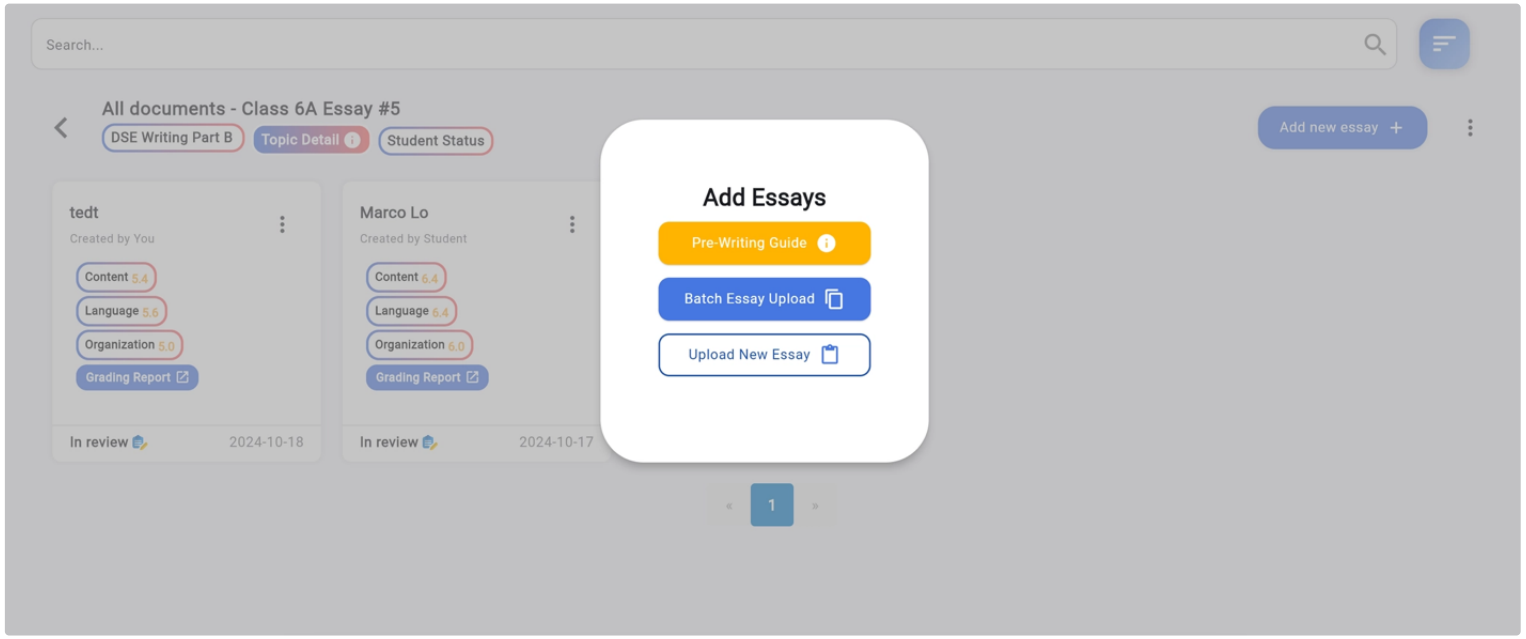
Teacher Upload (1)

[redacted]

To upload an essay, open the classroom you are currently working on and click "Add New Essay" on the top right corner. You can upload students' work individually or in batches.



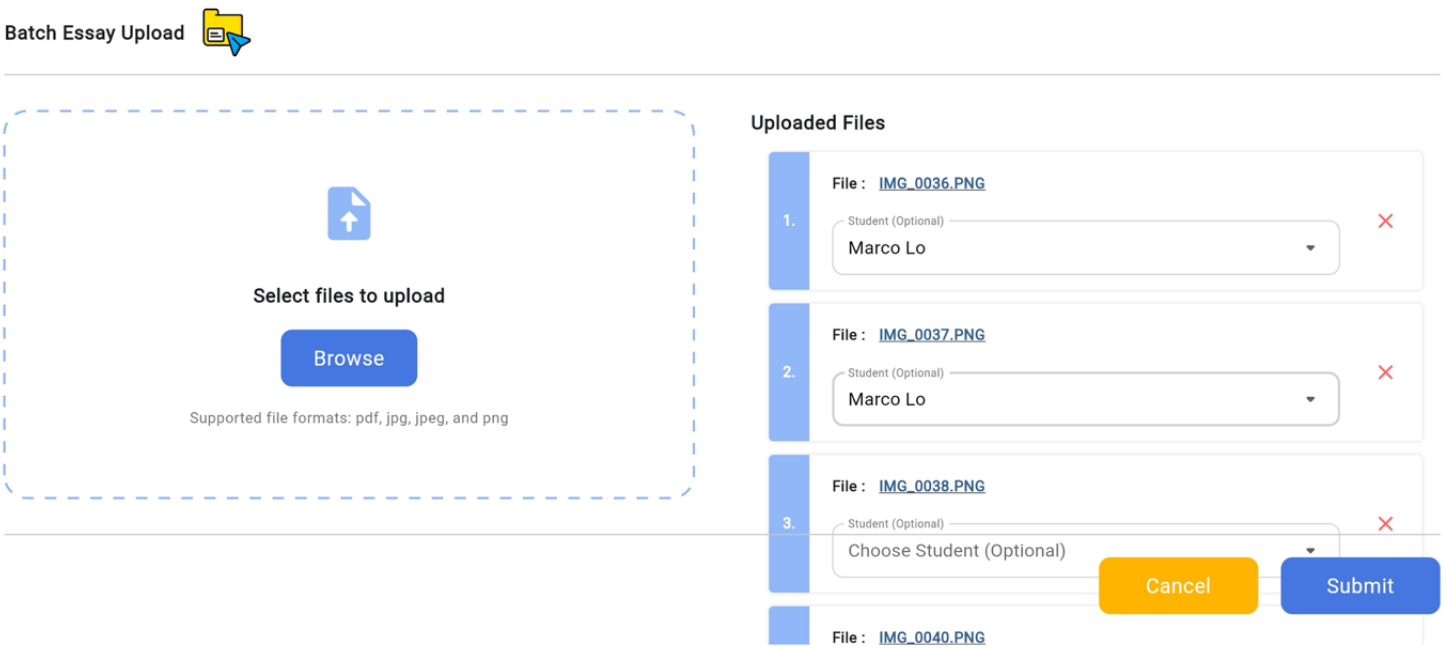
Individual upload

Access this via ‘Upload New Essay’

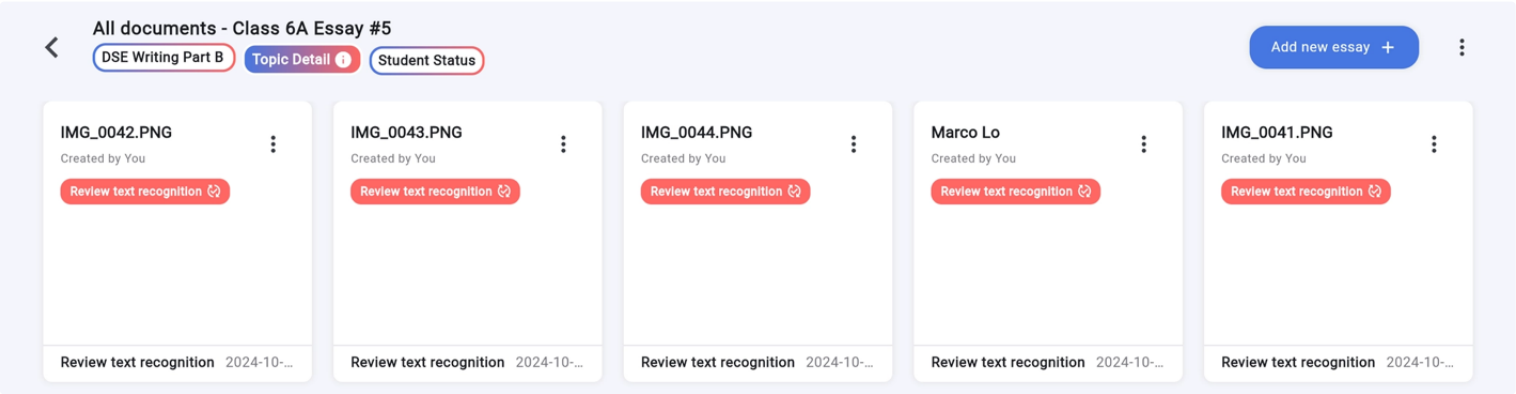
- You can upload a digital version of the student's essay (e.g., PDF, JPEG, or photo) or submit it by typing it out.
- For individual uploads, please refer to the student upload for a step-by-step process.

Batch upload

Access this via ‘Batch Essay Upload’



- Note that each document or photo will represent one student's work. You cannot upload a single file for the whole class, as Penso cannot recognize and sort individual students' work.
- Manually match each file to the respective's student name.
- Once you've completed the batch upload, you'll need to review the text recognition for each piece of work.



- After this review, you can submit the students' work to Penso.
