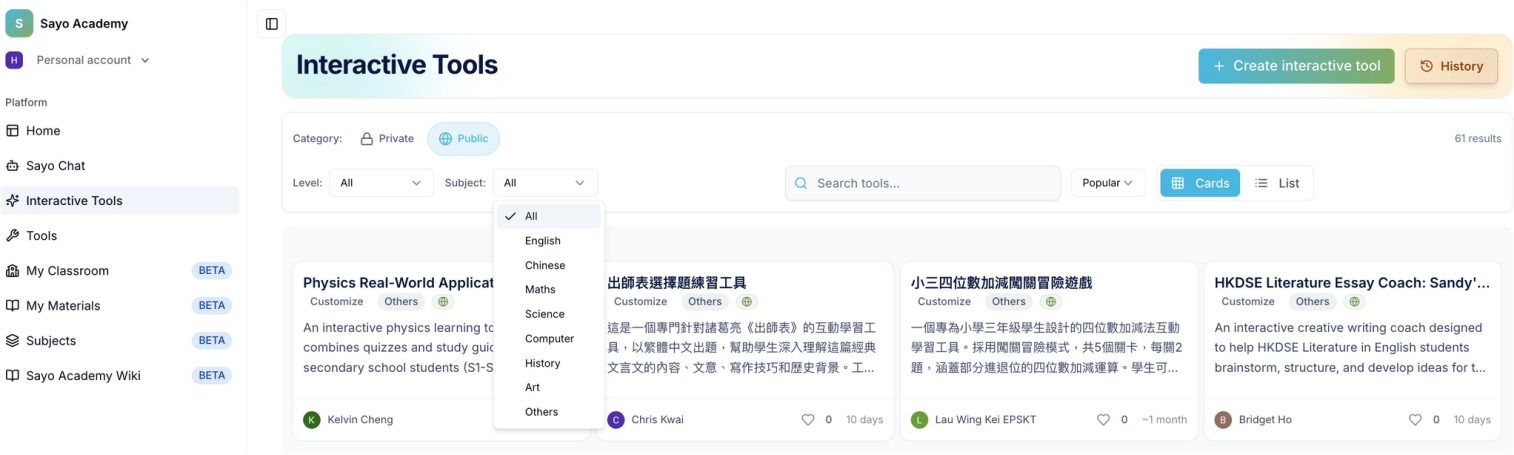
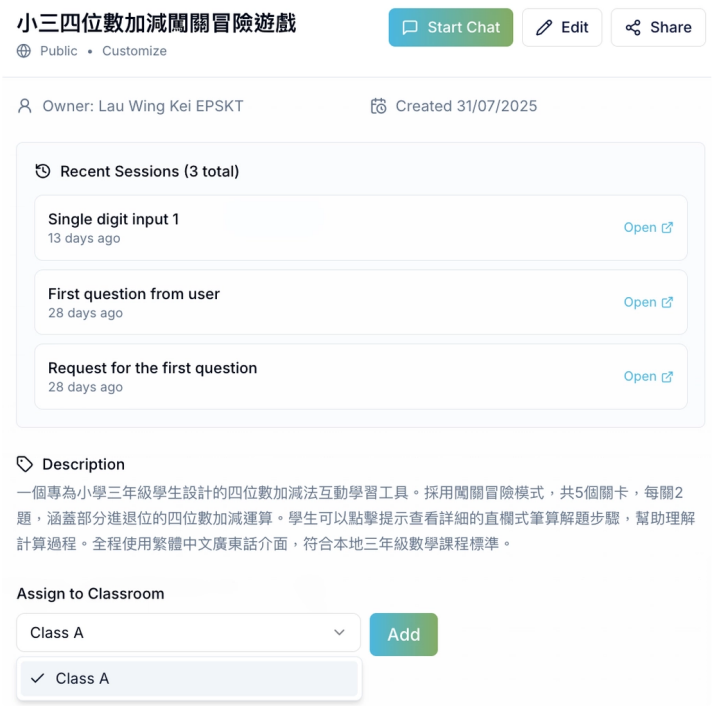
Assigning Pre-Made tools

You can save time by assigning pre-made learning tools to your students. These tools are ready to go and can be easily filtered by subject and academic level.





Finding and Previewing Tools

1. Navigate to the main tool library and select the **'Public'** category.
2. Refine your search by choosing a **level** (Primary or Secondary) and a specific **subject**.
3. Click on any tool you're interested in to view a detailed description.
4. To see the student's version of the tool and try it out yourself, click **'Start Chat'**.

Assigning a Tool to Your Class

Once you've found the right tool, you can assign it directly to your class.

1. On the tool's page, click **'Assign to Class'**.
2. Select the specific class you want to assign it to.

The tool will now be visible and accessible to all students in that class.
