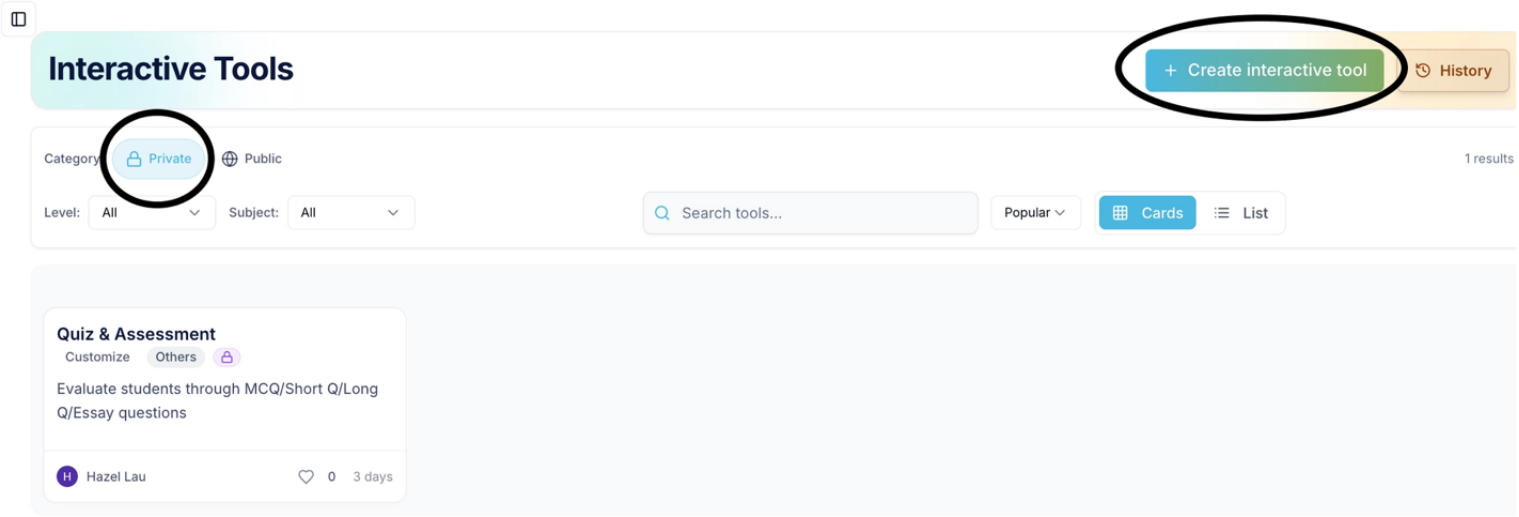
Creating a New Tool

To create the perfect interactive learning tool for your students, click **'Create Tool'**. You can tailor the tool based on the subject, activity type, target audience, and materials.



There are two ways to create a tool:

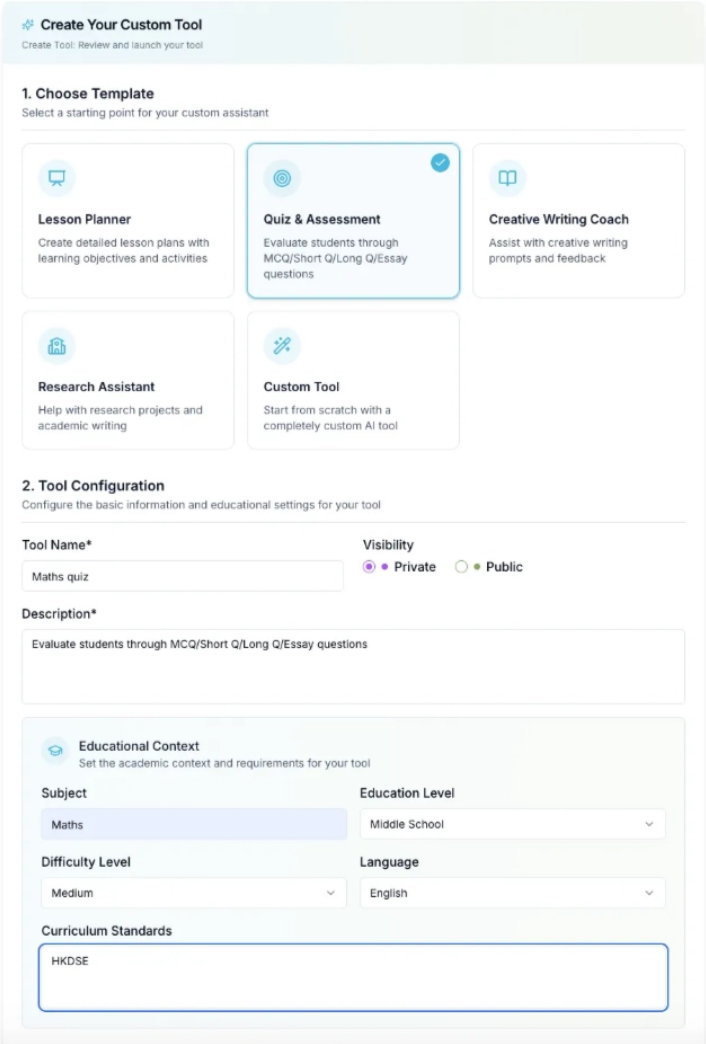
1. **Use Advanced Options:** Click the **'Advanced'** button for more detailed customisation.
2. **Chat with AI:** Describe your desired tool in the chat box.

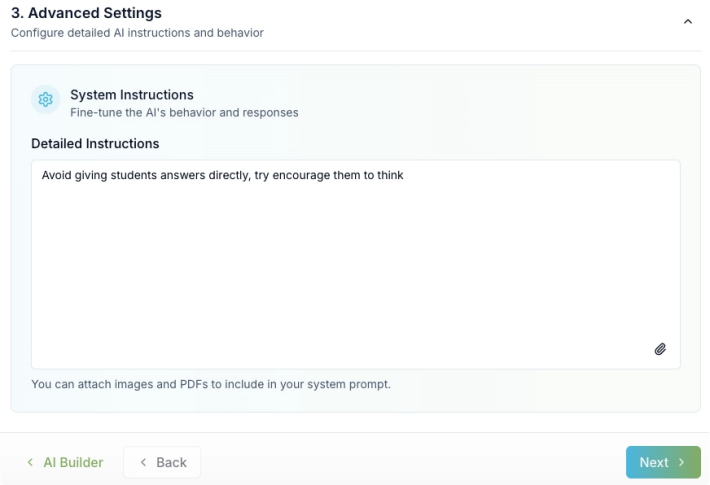
1. 🔮 Using Advanced Options

You can start by choosing from a variety of templates like:

- **Lesson Planner**
- **Quiz & Assessment**
- **Creative Writing Coach**
- **Research Assistant**
- **Custom Tool**

After choosing a template, you can customize the tool's details, including its name, description, and visibility (private or public). You can also set the educational context by defining the subject, difficulty, and curriculum standards to make the tool more relevant for your students.





This section allows you to fine-tune the behaviour of your custom AI tool. You can provide **System Instructions** to guide the AI on how to interact with students. For example, you can instruct it to "avoid giving students answers directly" and instead "encourage them to think." You can also attach images and PDFs to give the AI more context for its responses.

After you have finished, click **Next**. If you are ready for the tool to be visible, click **Create Tool**.

2. Chat with AI

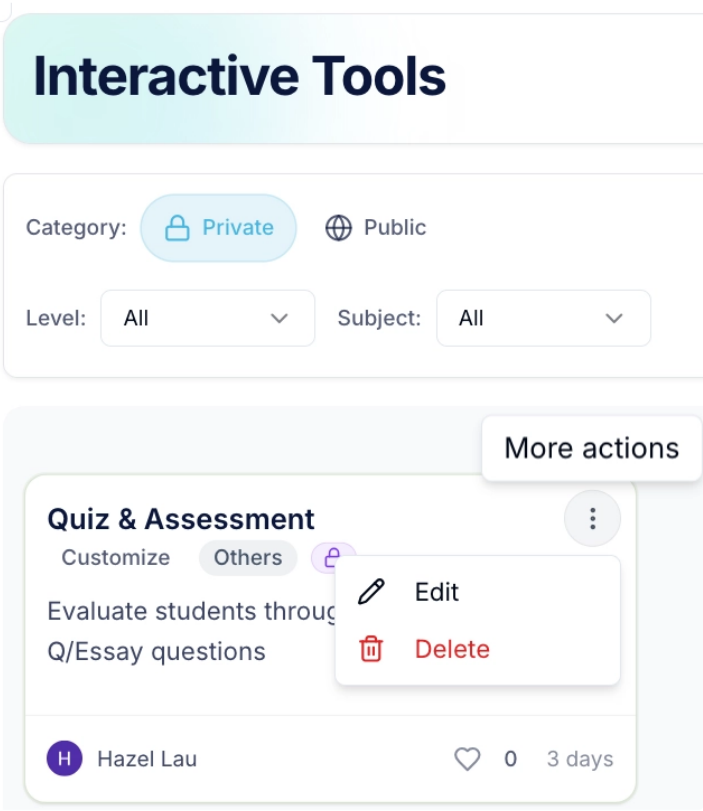
Review
Advanced
Hello! I'll help you create the perfect interactive learning tool.
I need to know:
• Subject/Topic - What do you want to teach?
• Activity Type - Quiz, study guide, practice exercises?
• Target Audience - Which grade level?
• Materials - Any specific curriculum or resources?
What subject would you like to focus on?
Quick Responses:
1. High school math quiz
2. Elementary science study guide
3. Language practice exercises
Type your question...

Making Amendments to a Tool

You can easily edit and update any tool you've created.

1. From your personal library, click the three dots next to the tool's name.
2. Select **'Edit'**.
3. You can now make any changes you need to the prompts and content.

Tip: Once you save your changes, the updates will be applied automatically.



🏛️ History

With your conversation history, you can view all of your previous conversations, see which tool was used, and the date and time of the interaction. You can also pick up where you left off by continuing a past conversation.

Your Conversation History
